Coping with Disasters

[Printer-friendly version](#) [E-mail to a friend](#)

After any type of disaster, people feel relieved to be alive. But then they often feel [stress](#), fear and anger. Most people will also find that they can't stop thinking about what happened. These feelings and memories aren't a sign of personal weakness. Most trauma survivors have stress reactions for days or weeks. But some people have long-term problems, including

- [Post-traumatic stress disorder](#)
- [Depression](#)
- Self-blame
- Suicidal thoughts
- Alcohol or drug abuse

If you've survived a disaster, talk to your family and friends
